

# NANDA NIC NOC

Kathryn Niemi Mølstad  
Senior Adviser

May 25, 2008

# NANDA INTERNATIONAL

## North American Nurses Diagnosis

- From 1973
- International
  - Steering board Gunn von Krogh and Dame June Clark. Next president is Dickon Weir-Hughes
  - Important for the international perspective

# A NANDA contains

- Title (label) code, a definition
- Defining characteristics, related factors
- Axis - codes?
- Established submission process
- New edition every 2 years

# Readiness for enhanced knowledge

Definition: The presence or acquisition of cognitive information related to a specific topic is sufficient for meeting health-related goals and can be strengthened.

Defining characteristics

- Behavior congruent with expressed knowledge
- Explains knowledge of the topic
- Expresses an interest in learning
- Describes previous experiences pertaining to the topic

# NIC

## Nursing Intervention Classification

- From 1987 – first edition 1992
- International --- not reflected in the board
- Four editions - linkages to NANDA published

# The Center for Nursing Classification and Clinical Effectiveness

was established in 1995 to facilitate the ongoing research of the Nursing Interventions Classification (NIC) and the Nursing Outcomes Classification (NOC).

# The purposes of the Center are to:

- Facilitate the continued development of NIC and NOC to reflect current nursing practices,
- Conduct the review processes and procedures for updating the Classifications,
- Produce and disseminate materials related to the Classifications,
- Provide office support to assist faculty investigators,
- Offer opportunities for students' and fellows' education and research

# An intervention contains

- Title (label) code, a definition
- Activities
- Axis - No

# Spiritual Growth Facilitation 5246

Definition: Facilitation of growth in patient's capacity to identify, connect with and call upon the source of meaning, purpose, comfort, strength, and hope in his/her life

# Activities

- Demonstrate caring presence and comfort by spending time with patient, patient's family, and significant others
- Encourage conversation that assists the patient in sorting out spiritual concerns.
- Model healthy relating and reasoning skills

# Activities cont'd

- Assist patient with identifying barriers and attitudes that hinder growth or self-discovery
- Offer individual and group prayer support
- Encourage participation in devotional services, retreats, and special prayer/study programs.

Etc.

# NOC

## Nursing Outcome Classification

- From – first edition
- International? No, NIC and NOC have the same board.
- Established submission process
- Third edition - linkages to NANDA published

# NOC contains

- Title, code definition.
- Outcome target rating, rating. From 1 -5
- Indicators (coded)

# Concentration (0905)

Definition: Ability to focus on a specific stimulus

Rating: Severely compromised ---- Not  
compromised

# Indicators

Maintains attention

Maintains focus without being distracted

Responds appropriately to visual cues

Responds appropriately to auditory cues

Responds appropriately to tactile cues

Etc

# Translated

- ICNP, Alfa og Beta versjon (96 og 98), Version 1 finished August 2008
- NANDA (2002)
- CCC versjon 2 (2004)
- NIC (2006)
- NOC (May 2007)

# The situation in Norway:

- One vendor (with a large audience) has implemented NANDA, parts of NIC
- The majority of nurses know little or nothing about terminologies
- No decision has been made about SNOMED CT
- NNO has established a terminology working group- recommend a terminology(ies) for use in documentation. Decision - Early 2009
